

Our services in Germany:

Delivering your promises!

INTRODUCTION

On the basis of our many years of experience in logistics services, we find the best solution for every consignment. Van Duuren drives to Germany on a daily basis, and also from Germany to the depot in Vianen. We have particular experience with locations that are difficult to reach, such as inner-city shopping centres. If necessary, we drive there in smaller vehicles. In all cases, we look for the best and fastest transport solution for the customer.

CUSTOMISATION IN PRACTICE

Two examples

Unloading in busy city centres

In city centres with narrow streets, we unload the cargo with smaller vehicles at those times when loading and unloading are allowed. If necessary, we ensure that a team is on hand to unload the consignment as quickly as possible, so that we can get out of the city in time.

Unloading at specific times

In Germany, we also deliver to larger logistics companies and we notice that planning is also becoming more tight. Fortunately, thanks to our extensive experience and good contacts in Germany, we can always meet specific wishes regarding time slots and special times for unloading.
